

REVIEW OF *FUZZ*

The parts about India were my favorite. I didn't realize elephants caused so many deaths. It's also surprising to hear there's a policy in some places that a leopard must kill *three* humans—not just one or two—before it will be killed in response.

I bought this audiobook mostly to have something to listen to that wouldn't demand close attention; it served well but I'll admit I zoned out more often than it deserved.
