

Review of Joseph K. Blitzstein and Jessica Hwang's book *Introduction to Probability*

by [Jacob Williams](#) on 2025-04-20
feedback is welcome at jacob@brokensandals.net

I mostly self-studied this book, along with watching a few of the [Stat 110 videos](#). The difficulty level of different chapters varies and I have a much hazier understanding of some of the topics covered (e.g. moment-generating functions) than others, but I feel like I learned a lot regardless.

An Anki deck I made from material in the book is available [here](#).
